Medical Contraindication Form

Michigan immunization law requires that a child enrolled in a school or child care center be immunized against the diseases specified unless a valid exemption applies. A child is exempt from these requirements for any specific immunization for any period of time for which a physician certifies that a specific immunization is or may be detrimental to the child's health. Any child with a medical contraindication to a particular vaccination is considered susceptible to that vaccine-preventable disease, and is subject to exclusion from school or center if an outbreak of the disease occurs in the school or center.
